Saif Nadeem Magoon PMP®

AI & Cloud Architect | Generative AI | Agentic AI | Azure OpenAI |
RAG | Semantic Kernel | .NET | Enterprise AI Platforms | PMP®
Karāchi, Sindh, Pakistan

Summary

Senior AI & Cloud Engineer with 8+ years of experience designing, building, and delivering enterprise-scale intelligent platforms, distributed systems, and cloud-native applications across consulting and professional services domains. Specialized in enterprise Generative AI solutions, Retrieval-Augmented Generation (RAG), AI agent orchestration, and scalable Azure-based architectures using Azure OpenAI, Semantic Kernel, and modern LLM technologies. Experienced in delivering production-grade AI platforms supporting intelligent automation, conversational AI, workflow orchestration, semantic search, and intelligent document processing for enterprise business workflows. Strong expertise in:

- Azure Cloud Architecture
- Enterprise AI Platforms
- Agentic AI & Multi-Agent Systems
- Retrieval-Augmented Generation (RAG)
- Semantic Search & Vector Databases
- Event-Driven Microservices
- Distributed Systems & CQRS
- DevOps Automation & Infrastructure-as-Code
- Performance Engineering & Scalable Architectures

Hands-on experience across 30+ Azure services including Azure AI Search, Cosmos DB, Azure Functions, API Management, Service Bus, Container Apps, Redis Cache, and SignalR. Proven track record of building scalable cloud-native platforms using .NET 8/9, React, TypeScript, and modern DevOps practices with CI/CD automation, Bicep IaC, and automated testing pipelines. Passionate about building enterprise AI systems that solve real-world business challenges through intelligent automation, scalable architecture, and production-ready AI engineering.

Experience

10Pearls Pakistan

4 years 10 months

Staff Software Consultant

June 2024 - Present (2 years 5 months)

Contributed to the architecture, development, and delivery of enterprise-scale AI and cloud-native platforms within a global professional services environment, supporting digital transformation initiatives across consulting, tax, audit, and enterprise operations.

Designed and implemented production-grade Generative AI solutions leveraging Azure OpenAI, Semantic Kernel, and Retrieval-Augmented Generation (RAG) architectures to enable conversational AI, intelligent document processing, workflow automation, and semantic knowledge retrieval.

Key Contributions:

- Engineered enterprise AI platforms using C#/.NET 8/9, React, and TypeScript integrating GPT-4o and advanced LLM technologies
- Implemented AI agent orchestration and multi-agent systems using Microsoft Semantic Kernel for automated research and intelligent workflow execution
- Designed scalable RAG pipelines using Azure OpenAI, Azure AI Search, vector search, and semantic retrieval strategies
- Architected cloud-native Azure infrastructure spanning 30+ Azure services including Cosmos DB, Azure Functions, API Management, Container Apps, Redis Cache, Service Bus, SignalR, and Azure AI services
- Built event-driven microservices architectures using MassTransit and Azure Service Bus for scalable distributed systems
- Developed asynchronous processing pipelines and distributed background task execution for long-running AI operations
- Implemented Infrastructure-as-Code using modular Bicep templates and automated CI/CD pipelines in Azure DevOps
- Established automated testing and quality engineering practices using xUnit, Jest, Playwright, and SonarCloud
- Conducted architecture and performance benchmarking exercises comparing Azure API Management and direct LLM integration strategies
- Implemented enterprise authentication and security using Azure AD and MSAL
- Collaborated cross-functionally with engineering, architecture, and business stakeholders to deliver scalable enterprise AI solutions

Staff Software Engineer

January 2024 - June 2024 (6 months)

Senior Software Engineer

January 2022 - January 2024 (2 years 1 month)

Karāchi, Sindh, Pakistan

Designing, coding, integrating and debugging applications
Ensure adherence to standards and best practices (e.g. source code control, code reviews etc.)
Conduct performance tuning, improvement, balancing, usability and automation testing
Mentor the other technical staff, assist them where needed and lead the effort in resolving technical challenges
Interact with the Project Manager frequently and provide feedback on progress, alert him of risks and help the PM develop a strategy to mitigate these risks

M3 Technologies Pakistan (Private) Limited

Software Engineer

August 2019 - January 2022 (2 years 6 months)

Karachi, Pakistan

Development of a progressive financial platform for small and medium-sized enterprises (SME). Leveraging the trusted Mastercard network, it provides business credit, financial products, and services, tailored to assist SMEs. It has built the next generation of financial e-tools to make your business banking experience efficient, just like the rest of your digital life.

Responsibilities:

- Explored strategies for the development of additional features and integration of other vendor services
- Built REST APIs for exposing data with the web client
- Built scheduled services that worked in a distributed manner
- Optimized query processing time to reduce server response time from a couple of minutes to a couple of seconds
- Reviewed and kept track of the work produced by peer developers
- Worked with large team and coordinated with leads to deliver milestones smoothly

Indistech

.Net Developer/VR Development

March 2018 - July 2019 (1 year 5 months)

Karachi, Pakistan

- Creating web based In House Application.
- Working with team to incorporate new and more efficient features to existing application/Products.
- Reporting Directly to CTO and CEO .

- Working with team provide solution and providing on the job to training to team deployed across Pakistan.
- Creating VR and AR application for marketing and promotional events .

Code Aesthetic

Junior Software Engineer

July 2017 - March 2018 (9 months)

Karachi, Pakistan

- Developed new features for 'My Food Cloud', enhancing user experience for the Texas Department of Agriculture.
- Created a SignalR service to facilitate real-time communication within the application.
- Implemented a SQL procedure that segmented the main database into 46 distinct databases, improving data management.
- Established a Continuous Integration environment using Jenkins, streamlining the deployment process linked with GitHub.

Sevto technologies

Internship Web Developer/Designer

May 2016 - September 2016 (5 months)

Pakistan, Karachi

aua solution

junior research associate

January 2013 - August 2013 (8 months)

karachi

Harvest Topworth International (HTI)

International Commodities Trader

June 2011 - October 2011 (5 months)

Education

SZABIST University - Islamabad Campus

Bachelor of Science (BSc), Computer Software Engineering · (2013 - 2017)
