PROFESSIONAL SUMMARY

Senior AI & Cloud Software Engineer with 8+ years of experience designing and delivering enterprise-scale distributed systems and intelligent platforms using .NET, Azure, and modern LLM technologies. Proven track record of building AI-powered applications, scalable microservices architectures, and cloud-native platforms supporting mission-critical business workflows.

Specialized in Retrieval-Augmented Generation (RAG), AI agent orchestration, and large-scale Azure infrastructure. Strong expertise in performance engineering, system design, and DevOps automation, with a focus on delivering production-grade AI solutions.

CORE EXPERTISE

Languages: C#, TypeScript, JavaScript

Frameworks: .NET 8/9, ASP.NET Core, React, Blazor

AI / LLM: Azure OpenAI, GPT-4o, Semantic Kernel, RAG, AI Agents, Vector Search

Cloud & DevOps: Azure, Bicep, Docker, Azure DevOps, CI/CD Pipelines

Architecture: Microservices, Event-Driven Architecture, CQRS, Clean Architecture

Data: SQL Server, Cosmos DB, PostgreSQL, MongoDB, Redis

Messaging: MassTransit, Azure Service Bus, REST APIs

Testing: xUnit, Jest, Playwright

PROFESSIONAL EXPERIENCE

Staff Software Consultant (AI & Cloud)

10Pearls Pakistan | 2024 – Present

Contributed to the architecture, development, and delivery of enterprise-scale AI and cloud-native platforms within a leading professional services firm's Innovation & Digital Office, supporting digital transformation across enterprise domains.

Key Achievements:

- Built enterprise AI platforms using C#/.NET 8/9, React, and TypeScript, integrating large language models for conversational AI, workflow automation, and intelligent document processing

- Implemented AI agent orchestration and multi-agent systems using Microsoft Semantic Kernel, enabling automated research and workflow execution
- Designed and deployed Retrieval-Augmented Generation (RAG) pipelines using Azure OpenAI and Azure AI Search for semantic knowledge retrieval
- Engineered Azure infrastructure across 30+ services including Cosmos DB, Service Bus, API Management, Container Apps, Redis, SignalR, and Azure Functions
- Developed event-driven microservices using MassTransit and Azure Service Bus for scalable distributed systems
- Built distributed caching layers using Redis to improve system performance and reduce latency
- Designed asynchronous processing patterns for long-running AI operations and background workflows
- Implemented Infrastructure-as-Code using modular Bicep templates for scalable environment provisioning
- Established CI/CD pipelines in Azure DevOps with automated testing (xUnit, Jest, Playwright) and SonarCloud quality gates
- Conducted performance benchmarking of API Management vs direct OpenAI integrations, influencing architectural decisions
- Implemented secure authentication using Azure AD and MSAL

Staff Software Engineer

10Pearls Pakistan | 2024

- Architected scalable microservices systems, improving performance by 35%
- Reduced system latency by 20% through optimized service design
- Delivered 15+ enterprise features with high reliability and on-time delivery
- Mentored engineers and improved code quality through structured reviews

Senior Software Engineer

10Pearls Pakistan | 2022 – 2024

- Designed and developed enterprise applications using .NET and cloud technologies
- Performed performance tuning, testing, and debugging for high-scale systems
- Enforced coding standards and best practices across teams
- Mentored developers and resolved complex technical challenges

Software Engineer

M3 Technologies Pakistan | 2019 – 2022

- Developed SME financial platforms integrated with Mastercard solutions
- Built REST APIs and backend services for scalable web applications

- Integrated third-party vendor systems to extend platform capabilities
 - Optimized database queries, reducing response times from minutes to seconds
 - Developed scheduled and distributed background processing services
-

.NET Developer / VR Development

Indistech | 2018 – 2019

- Developed web and VR/AR applications for enterprise marketing solutions
 - Delivered technical training and product enhancements across teams
-

EDUCATION

Bachelor of Science in Computer Software Engineering
SZABIST University | 2013 – 2017

CERTIFICATIONS

- Project Management Professional (PMP) – Project Management Institute (2025)
- Microsoft Generative AI & Azure AI Certifications (LinkedIn / Microsoft)
- Microservices Foundations – Kong
- Docker Foundations Certification

Additional Certifications: Generative AI, Cloud Architecture, Cybersecurity, and Software Engineering (LinkedIn Learning & Udemy)

KEY IMPACT

- Delivered 15+ enterprise applications with high client satisfaction
 - Improved system efficiency by up to 30% across multiple projects
 - Reduced latency and improved performance in distributed systems
 - Led AI adoption initiatives for enterprise clients
-

ADDITIONAL INFORMATION

- Languages: English (Professional), Urdu (Professional)
- Open to international relocation and remote opportunities
